# TOGAF® 9 Level 1 & Level 2 Certificate Course

Get certified in TOGAF 9 with this powerful 4-day training program.

TOGAF® is a proven enterprise architecture methodology and framework used by the world's leading organisations to improve business efficiency.

Get certified in TOGAF 9 with this powerful 4-day training program. The course focuses on the practical application of TOGAF in realistic enterprise architecture scenarios and provides thorough coverage of the knowledge needed for Level 1 / Level 2 certification.

The course is structured into two 2-day modules Foundation (Level 1) and Certified (Level 2). Modules can be taken separately although most prefer to take the combined course.

## Who Should Attend

The **Foundation** module is designed for:

- Architects who are looking for a first introduction to TOGAF 9
- Professionals who are working in roles associated with an architecture project
- Business Analysts, Systems Analysts and Technical Analysts who want to career develop into enterprise architecture
- Individuals who require a basic understanding of TOGAF 9

The **Certified** module is designed for anyone who requires a deeper understanding of TOGAF 9, e.g., System Integrators, Operational, Business and IT Developers, CIO's and IT Managers, Program and Project Leaders, IT Specialists, Architects

# **Learning Outcomes**

Individuals certified at Foundation level will acquire an understanding of:

- The basic concepts of Enterprise Architecture and TOGAF
- The core concepts of TOGAF 9
- The key terminology of TOGAF 9
- The ADM cycle and the objectives of each phase, and how to adapt and scope the ADM
- The concept of the Enterprise Continuum; its purpose and constituent parts
- How each of the ADM phases contributes to the success of enterprise architecture
- The ADM guidelines and techniques
- The key deliverables of the ADM cycle
- TOGAF reference models
- The TOGAF certification program.

# Individuals certified at Certified level will acquire an understanding of:

- How to apply the ADM phases in development of an enterprise architecture
- How to apply Architecture Governance in development of an enterprise architecture
- How to apply the TOGAF Architecture Content Framework
- How to apply the concept of Building Blocks
- How to apply the TOGAF Content Metamodel
- How to apply TOGAF recommended techniques when developing an enterprise architecture
- · How to adapt the ADM for security
- SOA as a style of architecture
- The key deliverables of the ADM cycle
- TOGAF reference models
- The TOGAF certification program

# **Course Contents**

#### **TOGAF 9**

Course + Exam (4 days)

#### **Level 1 (Foundation Module)**

- 1. Course Introduction
- 2. Enterprise Architecture An Introduction
- 3. TOGAF® 9 An Introduction
- 4. The Architecture Development Method
- 5. Adapting TOGAF to the Context
- 6. Architecture Principles and Requirements
- 7. Architecture Vision
- 8. Risk Management
- 9. Enterprise Integration
- Enterprise Continuum and Architecture Repository
- 11. Architecture Patterns
- 12. Architecture Content Framework
- 13. Technology Architecture
- 14. Building Organisational Capability
- 15. Architecture Governance
- 16. Exam Preparation Guide

## Level 2 (Certified Module)

- 1. Course Introduction
- 2. The Architecture Development Method
- 3. Adapting TOGAF to the Context
- 4. Architecture Principles and Requirements
- 5. Architecture Vision
- Stakeholder Management and Risk Management
- 7. Security Architecture
- 8. Enterprise Integration and Service Oriented Architecture
- 9. Enterprise Continuum and Architecture Repository
- 10. Architecture Content Framework
- 11. Business Architecture Phase
- 12. Information Systems Architectures
- 13. Technology Architecture
- 14. Transition Planning
- 15. Building Organisational Capability
- 16. Architecture Governance
- 17. The Architect
- 18. Exam Preparation Guide
