Cyber Security Foundation+Practitioner™

5 Days

ALC's flagship 5-day Cyber Security Foundation+Practitioner™ is the standout course for anyone who needs a sound understanding of Cyber Security and a solid base on which to build their career. It is the ideal course with which to upskill your team. Proven over many presentations, the course features a robust syllabus with a strong emphasis on practical exercises to reinforce understanding.

Cyber Security Awareness | General & Executives

1 Hour +

Effective cyber resilience starts at the top. We have a range of fully customisable courses designed to give C-Suite execs, management and the Board, the info they need to better understand the nature and magnitude of the cyber risks they face, their own role in addressing these risks, and the range of actions available to maximise their organisation's cyber resilience. We also have a fully customisable cyber awareness program for general staff.

CISSP® Certified Information Systems Security Professional

5 Days

CISSP® is long regarded as the gold standard of security qualifications. This intensive 5-day course provides information security professionals with a fully-immersed, minimum-distraction training experience that will broaden and deepen understanding of all CBK domains.

CISM® Certified Information Security Manager

4 Days

CISM® defines the core competencies and standards of performance expected of a world-class information security manager. It provides executive management with the assurance that those who have earned their CISM have the experience and knowledge to offer effective security management and advice.

CRISC® Certified in Risk and Information Systems Control

4 Days

CRISC® prepares and enables IT professionals for the unique challenges of IT and enterprise risk management and positions them to become strategic partners to the enterprise. This course comprehensively covers the full CRISC syllabus and prepares for the CRISC exam.

SABSA® Foundation

5 Days

Getting your architecture right is key to effective security. SABSA® is the world's most successful security architecture and ensures that the security needs of your organisation are met completely and are designed, delivered and supported as an integral part of your IT management infrastructure.

SABSA® Advanced A1: Risk and Assurance

5 Days

This SABSA Advanced module is designed for security professionals seeking to develop practical advanced competency to architect Business Risk, Assurance and Governance structures and processes in the SABSA context. Participants will master the skills and competencies to plan, design, implement and manage Risk, Assurance and Governance Architectures to their specific organisation, sector and culture.

SABSA® Advanced A3: Architecture and Design

5 Days

This SABSA Advanced module is designed for security professionals seeking to develop practical advanced competency to integrate and align Security and Risk with Enterprise Architecture Frameworks and Standards. Participants will master the skills and competencies to plan, design, implement and manage a SABSA Architecture and its through-life processes.

ISO 27001: 2013 ISMS Lead Implementer

5 Days

ISO 27001 is the international standard for effective Information Security Management Systems. This course provides comprehensive coverage of all aspects of an ISO 27001 project for implementing and maintaining a successful Information Security Management System.

ISO 27001: 2013 Lead Auditor

5 Days

ISO 27001 is the recognised international standard for best practice in information security management systems (ISMS) within any organisation. This course will prepare you to plan and execute audits of information security management systems in line with the international standard ISO/IEC 27001.

CLOUD COMPUTING

CCSP® Certified Cloud Security Professional

5 Days

Attackers never rest, and along with all the traditional threats targeting internal networks and systems, an entirely new variety specifically targeting the cloud has emerged. The six domains of CCSP® provide a thorough coverage of the security risks and mitigation strategies critical to data security in the cloud.

Cloud Computing Foundation

2 Days

This 2-day course is designed to remove the misinformation surrounding cloud and to provide participants with a solid and accurate understanding of the fundamentals of cloud computing – key terms and concepts, technical and organisational issues, characteristics and choices, how to go about creating an action plan.

Microsoft 365 Security and Compliance

2 Days

This unique course is delivered over 2 days and will provide you with an understanding of the current threat landscape and how Microsoft 365 security capabilities can be leveraged and configured to enable a cyber resilient and compliant digital organisation and effectively deliver modern security operations.

AGILE | NEW WAYS OF WORKING

DevOps Foundation®

2 Days

DevOps is the cultural and professional movement that stresses communication, collaboration, integration and automation in order to improve the flow of work between software developers and IT operations professionals. Improved workflows results in an improved ability to design, develop, deploy and operate software and services faster.

DevSecOps FoundationSM

2 Days

DevSecOps is like DevOps, but with security principles baked in. It is the philosophy of integrating security practices within the DevOps process. DevSecOps is a natural and necessary response to the bottleneck effect of older security models on the modern continuous delivery pipeline.

Professional Scrum Master™ (PSM)

2 Days

Professional Scrum Master™ (PSM) is the world premium certification for anyone wanting to master Scrum. Accredited by Scrum.org, the international Home of Scrum, the 2-day PSM course teaches what is at the heart of the Scrum and Agile movement and how to use Scrum to optimise value, reduce total cost of ownership and deliver more frequently.

CASM® Certified Agile Service Manager

2 Days

This course provides a comprehensive introduction to Agile Service Management – the application and integration of agile thinking into service management processes and process design projects.

PROJECT MANAGEMENT

PRINCE2® 6th Edition Foundation/Practitioner

5 Days

The full five day Certificate Program is designed for current or aspiring project management professionals who need to fully master the PRINCE2 framework and at the same time obtain a globally-recognised certification. This program is also ideal for anyone intending to become a Consultant or Trainer. The course is based on the new 2017 syllabus and includes both the Foundation and the Practitioner certificate exams.

AgilePM® Foundation/Practitioner

4 Days

Developed by APMG in association with the Agile Business Consortium, this certification course is aimed at anyone in a project environment who is looking for a leaner, structured approach that enables faster response to change and that is conducive to rapid implementation of high priority initiatives.

MSP® Managing Successful Programs

5 Days

MSP® fully-accredited course comprising Foundation (three day) and Practitioner Prep (two day) modules. It explores the MSP project management approach, where large complex change is broken down into manageable, inter-related projects, helping organisations to avoid pitfalls and achieve their transformational goals. The course is available as a five day combined Foundation/Practitioner course or as a three day Foundation module on its own.

BUSINESS ANALYSIS

Business Analysis Foundation™

4 Days

Business Analysis skills are increasingly in demand as organisations grapple with the need to ensure better return on project investment. Business analysts map out obstacles, analyse needs, manage project teams and implement changes that provide a critical role in determining project failure or success. Internationally-recognised qualification.

Business Analysis Practice™

3 Days

This course develops the skills needed to work with senior business and IT staff to effectively analyse and model business activities. Delegates will learn how to investigate business problems and how to identify and recommend appropriate creative solutions.

Requirements Engineering™

3 Days

This course will help you develop the skills needed to work with requirements stakeholders to ensure that requirements satisfy various perspectives and that conflicts are negotiated to a position of consensus.

Modelling Business Processes™

2 Days

This course enables delegates to learn and practice a variety of techniques for modelling and improving business processes and for evaluating the effectiveness of change.

AgileBA® Foundation/Practitioner

4 Days

This course has been designed to give the Business Analyst the skills needed to successfully gather, analyse, validate and champion the requirements throughout an Agile project. It also gives context to the Agile Business Analyst role beyond the individual project, in relation to organisational mission and strategy, providing additional depth and guidance for business analysis in an agile context.

IT SERVICE MANAGEMENT AND GOVERNANCE

ITIL® 4 Foundation

2 Days

ITIL 4 has been designed to help organisations meet the increasing challenges of today's complex digital environment by integrating concepts from Agile, DevOps and Design Thinking. ITIL 4 represents an advanced guidance that prepares organisations for success in their digital transformation journey by focusing on creating and delivering value to their customers.

ITIL® 4 Managing Professional Transition (MPT)

5 Days

Managing Professional Transition allows qualified ITIL v3 professionals to easily transition to ITIL 4 with just one course and one exam. You will gain thorough understanding of how to create, deliver, and support services and drive stakeholder value in the ITIL® 4 context. Upon passing the exam you will be awarded the designation of ITIL® 4 Managing Professional.

ITIL® 4 Specialist: Create, Deliver and Support (CDS)

3 Days

ITIL CDS addresses the cultural and team management aspects of product and service management, provides an overview of the tools and technologies which support service management, and demonstrates how to integrate different value streams and activities to create, deliver and support IT-enabled products and services, and relevant practices, methods and tools.

ITIL® 4 Strategist: Direct, Plan and Improve (DPI)

3 Days

Covering the core service management concepts and practices beyond foundation level, equipping organisations and individuals with better understanding and application to establish a learning and improving IT organisation. The principles, methods and techniques that can be universally used to direct, plan and improve are explored and explained in this course.

ITIL® 4 Specialist: Drive Stakeholder Value (DSV)

3 Days

This course covers the core service management concepts and practices beyond the foundational level to focus on the establishment, maintenance and development of effective service relationships, to achieve the desired stakeholder value.

ITIL® 4 Specialist: High Velocity IT (HVIT)

3 Days

This course provides an understanding of the ways in which digital organisations and digital operating models function in high-velocity environments, focusing on rapid delivery of products and services to obtain maximum value. Providing candidates with an understanding of working practices such as Agile and Lean and technical practices and technologies such as The Cloud, Automation, and Automatic Testing.

ENTERPRISE

COBIT® 2019 Foundation

2 Days

The just-released COBIT 2019 is the best COBIT yet, featuring many positive changes including modified principles, new design factors, updated goals cascade, modified processes (from 37 to 40), updated performance management, new detailed governance and management objectives.

TOGAF® 9.2 Level 1 and Level 2

4 Days

TOGAF is the world standard for enterprise architecture. It is the proven methodology and framework used by the world's leading organisations to improve business efficiency. The course focuses on the practical application of TOGAF in realistic enterprise scenarios and provides thorough coverage of the knowledge needed for Level 1 and Level 2 certification.

TOGAF® Business Architecture – Level 1

2 Days

The TOGAF Business Architecture Level 1 credential is to provide validation that individuals have knowledge and understanding of Business Modelling, Business Capabilities, TOGAF Business Scenarios, Information Mapping, and Value Streams and how to apply them in development of a Business Architecture based on the TOGAF® Standard, Version 9.2.

Organisational Change Management™

5 Days

Knowing how to effectively deal with change is more critical today than ever. This course from the leading international Change Management Institute (CMI) is available at both Foundation and Practitioner levels. It provides a comprehensive and independent benchmark for the professional knowledge expected of an effective Change Manager.

PRIVACY

CIPM Certified Information Privacy Manager

2 Days

This is the “how-to” training program for anyone implementing a privacy program framework, managing the privacy program operational lifecycle and structuring a high performing privacy team. Those taking this course will learn the skills to manage privacy in an organisation through process and technology – regardless of jurisdiction or industry.

CIPT Certified Information Privacy Technologist

2 Days

The CIPT is the first and only certification of its kind worldwide. It was launched by the International Association of Privacy Professionals (IAPP) in 2014 to meet the growing need that only technology professionals can fulfil – securing data privacy at all stages of IT product and service lifecycles.

CIPP/E Certified Information Privacy Professional (Europe)

2 Days

CIPP/E is the premier certification to understand data protection requirements for Europe. Developed in collaboration with leading law firms, the CIPP/E encompasses pan-European and national data protection laws, key privacy terminology and practical concepts concerning the protection of personal data and trans-border data flows.

WHAT YOU GET WHEN YOU TRAIN WITH ALC

QUALITY. Many things go into making a great training course but the most important is always the trainer. Everyone claims they have great trainers. What we can say is that we have a long history of sourcing the best. That has been our business model since the very beginning. For certain subjects our trainers are in fact world leaders. And for other subjects they are all outstanding – people with extensive experience who have distinguished themselves as training professionals over many years. They are enthusiastic about what they do and make learning an engaging experience.

RELIABILITY. We have a proven track record of helping more than 52,000 people in the region pass their exams.

VALUE. Quality usually comes at a premium but we work hard at all levels to ensure competitive pricing. Whether you're a small, medium or large organisation or a private individual, we make sure you get excellent value for your money.

CUSTOMER SERVICE. Our team is totally committed to providing the best customer service at all times. We will walk that extra mile.
